Underbench Purifiers

An underbench purifier is the final touch to your kitchen..

Concealed underbench system with it's own separate tap chosen from our range available.

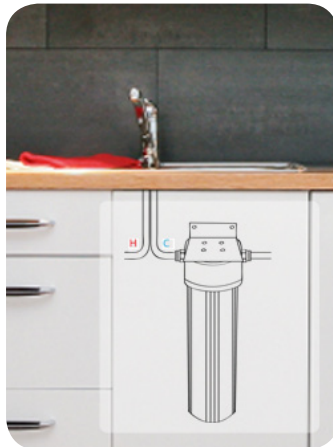

- Easy to install yourself
- Fitted with a 1 micron carbon filter which will remove or reduce chlorine, heavy metals*, chemicals, herbicides, pesticides, asbestos, giardia and cryptosporidium from your water. Your filter will also remove the odour and dramatically improve the taste. *CI251 Filter only

Inline Purifiers

Like the sound of all your kitchen water being purified?

- No need for an extra tap on your bench, this unit simply plumbs inline to your existing tap.
- Ideal for your **motorhome or boat.**
- Fitted with a one micron carbon block filter which will remove or reduce chlorine, chemicals, asbestos, herbicides, pesticides, giardia and cryptosporidium. Your filter will also remove the odour and dramatically improve the taste.

How a Water Purifier will benefit you..

Purifiers will remove harmful chemicals. If you don't have a filter, **you** are the filter.

Purified water will enhance the taste your cooking, tea, coffee, drinking water and more.

Save your money and the environment by refilling water bottles and not buying bottled water!

Your Animals and indoor plants love purified water too!

Purifier Taps

High quality, standard or deluxe purifier taps available to purchase with a new complete water purifier or to replace your existing tap with a stylish new ceramic model.

Benchtop Purifiers

Perfect for those of you who rent or travel!

Complete, portable benchtop purifier that is simply attached to any tap.

- Includes a universal rubber attachment, or a diverter to semi-permanently attach your purifier to your cold water tap.
- Fitted with a one micron carbon block filter. Can be converted to an underbench unit at any time, with the addition of a tap kit!

Mountain Fresh also manufacture outdoor drinking fountains for schools, kindergartens and council owned parks and supply water coolers perfect for your workplace. Phone or email us for more information!

UV Sterilisation Units

Ultra Violet Sterilisation is the ultimate in water purification. The unit consists of two pre-filters which remove particles, sediment and unwanted matter. The water is then sterilised with ultra violet irradiation, destroying; Bacteria & viruses, E-coli, Giardia, Hepatitis, Legionella, Salmonella, Cryptosporidium, Streptococcus and more. We have a range of UV systems to suit your needs. **Phone or email us for an information pack!**

Housings

Our housings are made in North America and manufactured with reinforced Polypropylenes which are FDA compliant. The housings come in four sizes; the ten inch housing used for underbench and benchtop purifiers (**HU14**). Single tap plumbed inline, 3/4" inlet outlet (**HU34**). Big white, jumbo ten-inch (**HBW**) or twenty inch (**HBW20**) for whole house pre filtration, rural or larger scale filtration. We have a wide range of filters that fit these housings to suit your filtration requirements.

Replacement filters

Mountain Fresh supply a wide range of water filters to suit your water purification needs. With various sizes, media and purposes available.
