

JUMBO CARBON REPLACEMENT INSTRUCTIONS

Please ensure you have read the instructions and that no parts are missing prior to installation.

Filter Type:

CBWC05, CBWC10; CBWGAC,
CBWGAC/KDF

Approximate life of your cartridge:
One Year

The life of the cartridge will vary depending on several factors, i.e. manufacturers recommendation, amount of water being used through the filter, turbid water supply, amount of sediment in the water etc. If the flow through the filter decreases or water taste deteriorates it may be time to replace the cartridge.

SUPPORT:

We are here to help, please call or email our technical support team.

Step 1. Turn water supply off at main water supply or local shut off valve. *Shut off valve is the fitting used to connect purifier to water pipe.*

Step 2. After turning the water off, turn on a household tap until the flow of water stops. This will confirm that your water has been turned off and relieves the water pressure. Now simply follow the instructions below.

Step 3. Unscrew housing base from top so filter can be removed (using wrench if necessary).

Step 4. Drain water from housing, and then remove the *old* filter.

Step 5. Wash out inside of housing with hot water and a small amount of normal dishwashing liquid if required. Ensure that the housing is rinsed well to remove any soap residue.

Step 6. Remove protective wrapping from the filter and place into the housing.

If using a twin system, put the larger micron rated filter into the first housing that the water enters.

Step 7. Before fitting the base and top together: Lubricate the O-ring with some Vaseline or vegetable oil. This will help to seal the unit. Make sure the housing O-ring is in place and not creased or buckled before screwing together tightly.

Step 8. Turn water supply back on and run water through the filter and check that everything is sealed correctly. *Run water for a few minutes to remove any carbon fines.*

How do you know when it's time to replace your filter?

We note your servicing record; this allows us to remember when you received your new filter. We will then remind you when it is time to replace it.

If your housings are located in the open and are vulnerable to frost, we suggest some material protection
